

COMPILATION OF WEB-RESOURCES ON HEALTH & HUMAN SECURITY

(Focus Pandemics: Coronavirus)

Version 1.1 (German Student Edition)

Sascha Werthes

(Editor)

Abstract

The goal of this compilation of web-resources and literature recommendations is to provide a useful sample of starting points for research and investigations on the Coronavirus Pandemics and human health security respectively.

Sascha Werthes is Senior Lecturer of International Relations in the Department of Political Science, Trier University. He was the Managing Director of the German Society of Political Science (Deutsche Gesellschaft für Politikwissenschaft, DGfP) from 2018 to 2019. From 2014 to 2018 he was the founding Managing Director of the Peace Academy Rhineland-Palatinate.

Werthes, Sascha (ed.) 2020: *Compilation of Web-Resources on Health & Human Security. (Focus Pandemics: Coronavirus). Version 1.1 (German Student Edition)*. Special Info-Sheet, 1/2020, Trier: Research Cluster Human Security & Resource Governance.

ACAPS – COVID-19 – Governments Measures

https://www.acaps.org/projects/covid19/data?utm_source=ACAPS&utm_campaign=669e22afe4-EMAIL_CAMPAIGN_2020_03_24_05_49&utm_medium=email&utm_term=0_8a07424dc9-669e22afe4-495373389

About: Dataset created by ACAPS. Some governments' measures may have yet to be included in the dataset. The dataset is updated every Tuesday and Thursday.

ACLED – COVID-19 Disorder Tracker

https://acleddata.com/analysis/covid-19-disorder-tracker/?utm_source=Armed+Conflict+Location+%26+Event+Data+Project&utm_campaign=90383a3cec-EMAIL_CAMPAIGN_2018_09_21_06_50_COPY_01&utm_medium=email&utm_term=0_26a454684a-90383a3cec-74424667

About: The rapid spread of the novel coronavirus and COVID-19 has caused a global pandemic. From China to Italy and the United States, many countries are taking unprecedented steps to curb the outbreak, with wide-ranging and uncertain repercussions for stability and security around the world. Even as the United Nations has called for an immediate global ceasefire to deal with “the true fight of our lives” (AP, 23 March 2020), some non-state armed groups like the Islamic State see the crisis as an opportunity to go on the offensive (DW, 23 March 2020).

How will COVID-19 impact trends in global disorder? How will it change the trajectory of conflict and demonstration patterns around the world?

Such a quickly evolving situation requires regular and reliable monitoring. Through the duration of the crisis, ACLED’s global network of remote researchers will continue to track these trends in real-time, publishing data on political violence and protest on a weekly basis to support ongoing research, policymaking, and humanitarian efforts. Starting now, ACLED is also launching special coverage of the pandemic’s impact on disorder around the world via our new COVID-19 Disorder Tracker (CDT).

The CDT aims to track and evaluate the following expected trends:

- While demonstration activity may initially spike in response to state management of the pandemic, it will soon decline as a function of concern over the spread of the virus, new medical guidelines, and/or government travel and assembly restrictions
- State repression will rise, especially in authoritarian states, under the guise of strict adherence to health security standards
- Mob violence too will rise, with vigilante mobs targeting marginalized groups, such as those suspected of being infected and Asian communities (due to the origin of the virus in China), amid an increase in general xenophobia
- Overall armed conflict rates may remain stable, yet the composition of conflict will change: militaries may decrease their activity as states divert resources to combatting the pandemic. At the same time, non-state actors may look to make 'big moves', especially as some may seize the opportunity presented by the coronavirus crisis to ramp up activity

The pandemic is still in its early stages and we expect trends to continue to evolve, especially in light of the exponential growth that can occur in numbers infected.

Bundeszentrale für gesundheitliche Aufklärung (BZgA) Informationen zum neuartigen Coronavirus / Covid-19

<https://www.infektionsschutz.de/coronavirus/>

About: Die Bundeszentrale für gesundheitliche Aufklärung (BZgA) stellt als Behörde im Geschäftsbereich des Bundesministeriums für Gesundheit auf diesen Seiten aktuelle und fachlich gesicherte Informationen rund um das Coronavirus und die Erkrankung Covid-19 bereit. Sie finden hier außerdem wichtige Hygiene- und Verhaltensregeln und -empfehlungen zur Vorbeugung von Infektionen. Alle Informationen werden zurzeit regelmäßig überprüft, angepasst und ergänzt.

Sascha Werthes

European Centre for Disease Prevention and Control (ecdc)

<https://www.ecdc.europa.eu/en/coronavirus>

<https://www.ecdc.europa.eu/en/novel-coronavirus-china>

About: The COVID-19 pandemic is rapidly evolving, and outbreak investigations are ongoing. ECDC is closely monitoring this outbreak, providing risk assessments, public health guidance, and advice on response activities to EU Member States and the EU Commission.

Centre for Humdata: COVID-19 in Countries with Humanitarian Operations

<https://data.humdata.org/visualization/covid19/>

About: We have created an interactive visual to track COVID-19 cases and deaths in locations with humanitarian response operations. The visual shows the cases in affected countries and the trend over time, based on figures from WHO. Read the UN's Global Humanitarian Response Plan for COVID-19 which identifies the most affected and vulnerable population groups in priority countries.

This visual shows the number of confirmed cases and deaths from the coronavirus disease (COVID-19) in locations with Humanitarian Response Plans (HRPs) or other type of response plan. The COVID-19 data is sourced from the World Health Organization (WHO). The countries include Afghanistan, Burkina Faso, Burundi, Cameroon, Central African Republic, Chad, Democratic Republic of the Congo, Ethiopia, Haiti, Iraq, Libya, Mali, Myanmar, Niger, Nigeria, occupied Palestinian territory, Somalia, South Sudan, Sudan, Syria, Ukraine, Venezuela and Yemen. More countries will be added as needed.

Centre for Humdata: COVID-19 Pandemic Data on HDX

<https://data.humdata.org/event/covid-19>

About: HDX now has a COVID-19 pandemic page to make it easy to find relevant data from our community. So far, we have data on cases and deaths from WHO and Johns Hopkins University (see visual), global travel restrictions from WFP, global school closures from UNESCO, government

measures from ACAPS, baseline health indicators from the World Bank, and more.

FAO - Q&A: COVID-19 pandemic – impact on food and agriculture

<http://www.fao.org/2019-ncov/q-and-a/en/>

About: Questions and short answers on COVID-19 pandemic and its impact on food and agriculture.

The Frontiers Coronavirus Knowledge Hub

https://coronavirus.frontiersin.org/?utm_source=em&utm_medium=f-nlt&utm_campaign=ba_cov-cco_hub-announcement

About: A global challenge like the current COVID-19 pandemic can only be defeated when research results are rapidly and openly shared and all stakeholders work together – scientists, health workers, publishers, funders, policymakers, and government officials.

The Frontiers Coronavirus Knowledge Hub provides an up-to-date source of trusted information and analysis on COVID-19 and coronaviruses, including the latest research articles, information, and commentary from our world-class scientific community.

Frontiers has also waived Article Processing Charges (APCs) and established a priority peer-review process for manuscripts submitted in response to the COVID-19 pandemic. This will further help ensure robust scientific research becomes openly available as soon as possible, for other researchers to build on and to enable evidence-based and factual decision-making for public authorities worldwide.

ILO – COVID-19 and the World of Work

<https://www.ilo.org/global/topics/coronavirus/lang--en/index.htm>

About: The world of work is being profoundly affected by the global virus pandemic. In addition to the threat to public health, the economic and social disruption threatens the long-term livelihoods and wellbeing of millions. The ILO and its constituents – Governments, workers and

employers – will play a crucial role in combating the outbreak, ensuring the safety of individuals and the sustainability of businesses and jobs.

Learn more about COVID-19 and the world of work: Impact and policy responses.

International Monetary Fund – The IMF and COVID-19 (Coronavirus)

<https://www.imf.org/en/Topics/imf-and-covid19>

About: Updates and background information on IMF's work related to the pandemic.

IOM Responds to COVID-19

<https://www.iom.int/iom-responds-covid-19>

About: Updates and background information on IOM's work related to the pandemic. On 19 March, IOM launched the USD 116.1 million COVID-19 Global Strategic Preparedness and Response Plan (SRP) to support countries that may need additional resources – financial, technical or operational – to help ensure that further COVID-19 infections are prevented, and to assist health systems so they have increased capacity to cope with additional requirements.

Impact of COVID-19 on UN Peacekeeping

<https://peacekeeping.un.org/en/impact-of-covid-19-un-peacekeeping>

About: The Department of Peace Operations and the Department of Operational Support, including the Division of Healthcare Management and Occupational Safety and Health, are carefully reviewing all troop and police rotations scheduled over the coming six months. Some countries have been asked to delay rotations by three months to maintain operational strength and execute their mandated tasks.

In the meantime, peacekeeping missions are putting in place a series of mitigation measures to promote the safety, security and health of all UN personnel while maintaining continuity of operations. Leadership is in regular contact with troop- and police- contributing countries and working closely with the Department of Operational Support, the Office of Military

Affairs and the Police Division to monitor the situation and advise governments according to the latest developments.

Johns Hopkins – Coronavirus Resource Center

<https://coronavirus.jhu.edu/>

<https://coronavirus.jhu.edu/map.html>

About: Johns Hopkins experts in global public health, infectious disease, and emergency preparedness have been at the forefront of the international response to COVID-19.

This website is a resource to help advance the understanding of the virus, inform the public, and brief policymakers in order to guide a response, improve care, and save lives.

OCHA and COVID-19

<https://www.unocha.org/covid19>

About: The coronavirus now has a foothold in more than 185 countries. Some of these are countries that are already in crisis due to conflicts, natural disasters and climate change. They are home to a large number of people in need of emergency assistance.

Through these challenging times, OCHA is determined that its crucial life-saving work is sustained. More than 100 million people already rely on support from the United Nations' humanitarian agencies. OCHA's top priority is to ensure that we do the best we can to keep providing life-saving help for those people, while supporting the wider system's response to COVID-19.

OECD – Key Policy Responses from the OECD

http://www.oecd.org/coronavirus/en/?utm_source=Adestra&utm_medium=email&utm_content=CTA%3A%20Discover%20the%20data&utm_campaign=Tackling%20the%20coronavirus%20%28COVID-19%29&utm_term=demo#id-8

About: The OECD is moving forward with proposals for adaptation and change.

OECD – Key Impacts

http://www.oecd.org/coronavirus/en/?utm_source=Adestra&utm_medium=email&utm_content=CTA%3A%20Key%20Impacts&utm_campaign=Tackling%20the%20coronavirus%20%28COVID-19%29&utm_term=demo#id-2

About: What are the impacts and consequences of the coronavirus pandemic on our lives and our societies – and what are some of the solutions we can find to boost our healthcare systems, secure our businesses, maintain our jobs and education, and stabilise financial markets and economies?

OECD- Country Profiles: How resilient were the healthcare systems in Europe before the pandemic hit?

http://www.oecd.org/coronavirus/en/?utm_source=Adestra&utm_medium=email&utm_content=CTA%3A%20Country%20Profiles&utm_campaign=Tackling%20the%20coronavirus%20%28COVID-19%29&utm_term=demo#id-4

About: The capacity of countries to cope with the impacts of the coronavirus depend heavily on the state of their health systems. Here's a 2019 overview of the health systems in Europe.

OECD – Coronavirus Data in Real-Time

http://www.oecd.org/coronavirus/en/?utm_source=Adestra&utm_medium=email&utm_content=CTA%3A%20Discover%20the%20data&utm_campaign=Tackling%20the%20coronavirus%20%28COVID-19%29&utm_term=demo#id-8

About: Follow the latest coronavirus (COVID-19) developments in your country in real time with the OECD's AI-powered tool. Plus, check out other data visualisation tools and resources at the link below!

OHCHR - COVID-19 and human rights

<https://www.ohchr.org/EN/NewsEvents/Pages/COVID19andHR.aspx>

About: As the virus expands further and wider, and countries are driven to take more and more drastic measures to slow down its spread, a number of human rights institutions and experts have been highlighting issues of concern and proposing possible solutions.

Our World in Data -

Coronavirus Disease (COVID-19) – Statistics and Research

<https://ourworldindata.org/coronavirus#citation>

About: While most of our work focuses on large problems that humanity has faced for a long time – such as child mortality, natural disasters, poverty and almost 100 other problems (see here) – this article focuses on a new, emerging global problem: the ongoing outbreak of the coronavirus disease [COVID-19]. The outbreak started in late 2019 and developed into a global pandemic by March 2020.

The purpose of this article on COVID-19 is to aggregate existing research, bring together the relevant data and allow readers to make sense of the published data and early research on the coronavirus outbreak.

Most of our work focuses on established problems, for which we can refer to well-established research and data. COVID-19 is different. All data and research on the virus is preliminary; researchers are rapidly learning more about a new and evolving problem. It is certain that the research we present here will be revised in the future. But based on our mission we feel it is our role to present clearly what the current research and data tells us about this emerging problem and especially to provide an understanding of what can and cannot be said based on this available knowledge.

As always in our work, one important strategy of dealing with this problem is to always link to the underlying original research and data so that everyone can understand how this data was produced and how we arrive at the statements we make. But scrutiny of all reported research and data is very much required.

Robert Koch Institut – COVID-19 (Coronavirus SARS-CoV-2)

https://www.rki.de/DE/Content/InfAZ/N/Neuartiges_Coronavirus/nCoV.html

https://www.rki.de/EN/Home/homepage_node.html

About: All federal states have reported cases of infection with the new coronavirus (SARS-CoV-2). The Robert Koch Institute is continuously monitoring the situation, evaluating all available information, estimating the risk for the population in Germany and providing health professionals with recommendations.

Information on the novel coronavirus and hygiene for the general public is available on the website of the Federal Centre for Health Education. Additionally, lots of authorities and health insurances have set up hotlines.

Think Global Health

<https://www.thinkglobalhealth.org/about-site>

About: Think Global Health is a multi-contributor website that examines the ways in which changes in health are reshaping economies, societies, and the everyday lives of people around the globe. The articles on this website will consider the ways that health influences and interacts with broader social, economic, and demographic trends, ranging from the global growth of cities and the migration of people, to the effects of climate change and worldwide trends in agriculture, to the expansion of international supply chains and the empowerment of women and girls.

The mission of Think Global Health is to provide a compelling forum for exploring where and why global health matters and to engage readers in the debates and efforts to improve health worldwide. In taking this approach, this website will advance understanding of global health as an investment in societies and economies, not only as a form of humanitarian or emergency relief.

Think Global Health is an initiative of the Council on Foreign Relations in collaboration with the Institute for Health Metrics and Evaluation (IHME) at the University of Washington. Think Global Health was made possible by a generous grant from Bloomberg Philanthropies.

All statements and views expressed on this website are solely those of the individual author(s) and are not necessarily shared by his/her/their

institutions. The Council on Foreign Relations takes no institutional positions on policy issues and has no affiliation with the U.S. government.

UNDP – COVID-19 pandemics

<https://www.undp.org/covid-19-pandemic-response.html>

About: Every country needs to act immediately to prepare, respond, and recover. The UN system will support countries through each stage, with a focus on the most vulnerable.

Drawing on our experience with other outbreaks such as Ebola, HIV, SARS, TB and malaria, as well as our long history of working with the private and public sector, UNDP will help countries to urgently and effectively respond to COVID-19 as part of its mission to eradicate poverty, reduce inequalities and build resilience to crises and shocks.

UNESCO - Global Education Coalition for COVID-19 Response

<https://en.unesco.org/covid19/educationglobalcoalition>

About: School closures are part and parcel of the increasingly stringent measures taken by governments to contain the spread of COVID-19. Over a billion students and youth across the planet are affected by school and university closures.

We have a special responsibility to ensure the continuity of education & keep learning processes for all learners. In times of massive school closures and distance learning. School closures have a long history of exacerbating learning inequities and hurting the most vulnerable children and youth disproportionately.

This coalition is dedicated to working with governments to find solutions to leave no one behind and elevate the importance of equity and gender equality in educational responses to the COVID-19 crisis. We are United Nations Agencies, International Organizations, Private Sector, Civil Society representatives engaged in advancing COVID-19 Education Response from around the world at global, regional and countries levels.

WHO Health Emergency Dashboard

<https://extranet.who.int/publicemergency>

About: The World Health Organization (WHO) Health Emergency Dashboard is a platform which aims to share information about public health events and emergencies. The data on the dashboard is refreshed every fifteen (15) minutes and data is accurate as at time of refreshing.

The WHO Health Emergency Dashboard is not a comprehensive representation of all the events and emergencies that WHO is aware of and responding to. The events displayed are a subset of those reported through official channels as mandated by the International Health Regulations (IHR 2005). The content of the WHO Health Emergency Dashboard is for general information only. It is subject to change without notice. While every reasonable effort has been made to make the information on the WHO Health Emergency Dashboard as timely and accurate as possible, WHO makes no claims, promises or guarantees about the effectiveness, completeness and accuracy of the contents of the WHO Health Emergency Dashboard, and expressly disclaims any liability for damages as a result of the use and/or application of the WHO Health Emergency Dashboard, errors and/or omissions in the content. The responsibility for the interpretation and use of the content lies with the reader. WHO reserves the right to make updates and changes to posted content without notice and accepts no liability for any errors or omissions in this regard. WHO assumes no responsibility or liability for any consequence resulting directly or indirectly from any action or inaction readers take based on or made in reliance on the information and material available on the WHO Health Emergency Dashboard. While every reasonable effort has been made to use appropriate language and pictures on the WHO Health Emergency Dashboard, WHO expressly disclaims any responsibility for inadvertent offensive or insensitive, perceived or actual, language or pictures. WHO will take no responsibility for or be liable for the WHO Health Emergency Dashboard being temporarily unavailable in the event of technical or other issues.

About: Learn how we are coordinating with partners to accelerate the international response and support countries to manage the global pandemic.

World Economic Forum – COVID Action Platform

<https://www.weforum.org/platforms/covid-action-platform>

About: As the International Organization for Public-Private Cooperation, the World Economic Forum, acting as partner to the World Health Organization, is mobilizing all stakeholders to protect lives and livelihoods.

Context: The dramatic spread of COVID-19 has disrupted lives, livelihoods, communities and businesses worldwide. All stakeholders, especially global business, must urgently come together to minimize its impact on public health and limit its potential for further disruption to lives and economies around the world.

But the sum of many individual actions will not add up to a sufficient response. Only coordinated action by business, combined with global, multistakeholder cooperation – at exceptional scale and speed – can potentially mitigate the risk and impact of this unprecedented crisis.

Our contribution: The spread of COVID-19 demands global cooperation among governments, international organizations and the business community. This multistakeholder cooperation is at the centre of the World

Economic Forum's mission as the International Organization for Public-Private Cooperation.

In this context, the new COVID Action Platform will focus on three priorities:

- Galvanize the global business community for collective action
- Protect people's livelihoods and facilitate business continuity
- Mobilize cooperation and business support for the COVID-19 response

Get the latest insights on the coronavirus and its effect on global health, the economy, and more.

Reporter Ohne Grenzen (Themenseite zur Pandemie)

<https://www.reporter-ohne-grenzen.de/themen/pressefreiheit-in-der-corona-krise/>

About: Die Covid-19-Pandemie hat weltweit gravierende Auswirkungen auf die Pressefreiheit. Regierungen halten Informationen über das Ausmaß der Epidemie zurück. Manche Regime versuchen, die Berichterstattung zu manipulieren. Journalistinnen, Journalisten und ihre Redaktionen werden festgenommen oder angefeindet, weil sie unabhängige Informationen über die Epidemie veröffentlichen. Einige Regierungen sammeln flächendeckend sensible Daten oder bestrafen die Verbreitung „falscher“ Informationen zur Corona-Krise. Inhaftierte Medienschaffende sitzen in überfüllten Gefängnissen mit schlechter Gesundheitsversorgung fest. Akut bedrohte Journalistinnen und Journalisten können wegen geschlossener Grenzen nicht ins Ausland fliehen.

Um die vielen Entwicklungen weltweit zu bündeln und sichtbarer zu machen, startet Reporter ohne Grenzen (RSF) eine eigene Themenseite zu den Auswirkungen der Corona-Krise auf die Pressefreiheit. Unter www.reporter-ohne-grenzen.de/corona veröffentlichen wir ab sofort fortlaufend Pressemitteilungen, Videos, Kurzmeldungen in sozialen Netzwerken wie Facebook, YouTube und Twitter zu den Auswirkungen der Corona-Krise auf die Pressefreiheit.

„Gerade in einer Krise wie der Corona-Pandemie ist Pressefreiheit unverzichtbar“, sagte der Geschäftsführer von Reporter ohne Grenzen, Christian Mihr. „Angesichts der dramatischen Entwicklungen weltweit müssen die Menschen in der Lage sein, sich aus vielfältigen Quellen zu informieren und das Handeln der Behörden auch kritisch zu hinterfragen. Viel zu viele Regierungen reagieren auf die Corona-Krise mit autoritären

Reflexen wie Zensur, Überwachung, Repression und Desinformation. Wer jetzt eine unabhängige Berichterstattung einschränkt, vergrößert nicht nur die Verunsicherung, sondern setzt Menschen auch ganz realen Gefahren aus.“

Scitrus: Novel Coronavirus Outbreak

Chatham House: COVID-19 – Early Reflections on the Global Outlook (Webinar)

https://www.chathamhouse.org/file/webinar-covid-19-early-reflections-global-outlook?utm_source=Chatham%20House&utm_medium=email&utm_campaign=11426915_EER%20Newsletter%20-%20March%20%2B%20Online%20events&dm_t=0,0,0,0,0&dm_i=1S3M,6SX2B,S3DBMD,R8BYW,1

About: Could the COVID-19 pandemic present world leaders with an opportunity to come together? Amid the growing global impact of the COVID-19 pandemic, governments are scrambling to respond to what is a combined medical and economic emergency. Much of the response to date has been disjointed with only a few signs of international coordination. For several years, there have been warnings that states would find it difficult to manage a new global crisis in an increasingly confrontational, protectionist and nativist political environment. But could the pandemic yet present world leaders with an opportunity to come together? Does the pandemic have the potential to end globalization as we know it? What could international cooperation realistically achieve? And, in the long-term, could the crisis provide an opportunity to shift towards more sustainable and resilient political, economic and financial architectures?

Speaker: Dr Robin Niblett CMG, Director and Chief Executive, Chatham House; Creon Butler, Research Director, Trade, Investment & New Governance Models and Director, Global Economy and Finance Programme, Chatham House; Emma Ross, Senior Consulting Fellow, Global Health Programme, Chatham House

Chair: Laura Wellesley, Research Fellow, Energy, Environment and Resources Programme, Chatham House

WhatsApp Coronavirus Information Hub

<https://www.undp.org/content/undp/en/home/presscenter/pressreleases/2020/COVID->

[19_WHO_UNICEF_UNDP_Partner_with_WhatsApp_to_Get_Real_Time_Health_Information_to_Billions_around_the_World.html](https://www.undp.org/content/undp/en/home/presscenter/pressreleases/2020/COVID-19_WHO_UNICEF_UNDP_Partner_with_WhatsApp_to_Get_Real_Time_Health_Information_to_Billions_around_the_World.html)

<https://www.whatsapp.com/coronavirus>

About: WhatsApp today announced the launch of two initiatives in support of the global fight against the Coronavirus pandemic: the global launch of the WhatsApp Coronavirus Information Hub in partnership with the United Nations Development Programme, the World Health Organization and UNICEF, and a \$1m donation to the Poynter Institute's International Fact-Checking Network (IFCN).

The WhatsApp Coronavirus Information Hub provides simple, actionable guidance for health workers, educators, community leaders, nonprofits, local governments and local businesses that rely on WhatsApp to communicate. The site also offers general tips and resources for users around the world to reduce the spread of rumors and connect with accurate health information.

These recommendations provide quick guidance on how small groups can make the most of WhatsApp features, and will be distributed by UNDP to those coordinating local efforts. In addition, WhatsApp is working with the WHO and UNICEF to provide messaging hotlines for people around the world to use directly. These hotlines will provide reliable information and will be listed on the WhatsApp Coronavirus Information Hub.

WHO: Coronavirus - questions and answers (Q&A)

<https://www.youtube.com/watch?v=OZcRD9fV7jo&feature=youtu.be>

About: What is a coronavirus? Where do they come from? How can I protect myself? Watch this Q&A from the World Health Organization for the answers.

WHO: Coronavirus - seven steps to prevent the spread of the virus (Short Video)

https://www.youtube.com/watch?v=8c_UJwLq8PI&feature=youtu.be

About: The formal declaration of a #COVID19 #pandemic does not change the fact that you can - and should - take these simple steps to protect yourself and your loved ones. Watch and share this WHO video!

WHO: COVID-19 (Short Animation)

<https://www.youtube.com/watch?v=1APwq1df6Mw&feature=youtu.be>

About: COVID-19 is an infectious disease caused by a new coronavirus introduced to humans for the first time.

It is spread from person to person mainly through the droplets produced when an infected person speaks, coughs or sneezes.

Watch this short animation to learn more about COVID-19 and how to protect yourself against it.

Supplementary Note on Version 2020 1.1 (German Student Edition):

The goal of this compilation of web-resources and literature recommendations is to provide a useful sample of starting points for research and investigations on the Coronavirus Pandemics and human health security respectively.

The compilation should serve as a common knowledge resource. Creating a common knowledge resource, however, also depends on the users. We would appreciate if you help us improving and updating the compilation. An easy and simple way will be sending the authors an email informing them of institutions and entities currently not enlisted in the compilation. We will add the item to the compilation in due course.
